PROFILE

Junior developer with seven end-to-end projects in Java/Spring Boot, C#/.NET and React, plus two products live in production: one my own, one for a real client. Strong on the backend, focused on quality: edge cases, endpoint validation and error handling. Studying Systems Analyst at ORT, thesis in progress. Looking for my first junior role in development, QA or IT support.

FEATURED PROJECTS

RouteEV — Trip planner for electric vehicles in Uruguay · 2026, actively developed https://routeev.uy/

Python · FastAPI · React Native (Expo) · TypeScript · JavaScript · Leaflet / MapLibre · JWT · REST

- Custom routing engine over the country's real road graph (63,800+ OpenStreetMap intersections): checks battery segment by segment and inserts charging stops when range falls short.
- Catalogue of 585 electric vehicle models and Uruguay's 213 UTE charging stations, with an open trip simulator that requires no account.
- Full end-to-end product: REST API with JWT authentication, web frontend and a React Native mobile app with background trip tracking.
- Validated with real users: a survey of EV drivers reshaped the roadmap. Mobile app being prepared for the app stores.

PF Negocios Inmobiliarios — Live site for a real estate agency · 2026 https://pfinmobiliaria.uy/

Next.js · React · TypeScript · Supabase (Postgres + Storage) · SSR · SEO

- Property catalogue with combinable filters (listing type, bedrooms, bathrooms, amenities, pets) reflected in the URL, so every search stays shareable and indexable.
- Data and photos in Supabase so the agency publishes without touching code; each property gets its own page with server-generated Open Graph metadata.
- Frictionless contact: WhatsApp hand-off with the message pre-filled per property, plus visit scheduling. Mobile-first, used daily by the business.

TECHNICAL SKILLS

Languages: Java, C#, Python, JavaScript, TypeScript, SQL, HTML5, CSS3
Frameworks: Spring Boot, .NET / ASP.NET MVC, FastAPI, React, Next.js, React Native (Expo), Entity Framework, Bootstrap
Databases: MySQL, SQL Server, PostgreSQL (Supabase), MongoDB — normalisation and schema design
QA & testing: Postman, Swagger / OpenAPI, endpoint validation, edge-case analysis, debugging
Tools: Git, GitHub, Maven, IntelliJ IDEA, VS Code, MVC architecture, REST APIs, Agile / Scrum
Cloud: AWS Academy, Microsoft Azure (fundamentals)

OTHER PROJECTS

Objective Tracker Dashboard | Java · Spring Boot · React · MySQL · 2025 — Multi-tier REST API with a React dashboard; three-person Scrum team.
Sports & Athletes Management System | C# · ASP.NET MVC · SQL Server · Swagger · 2025 — Normalised four-entity SQL schema, role-based access and a documented API. Fixed eight edge-case bugs to get the suite green.
Toll Management REST API | Java · Spring Boot · 2025 — Clean layered architecture with correct HTTP semantics and full Swagger docs.
Food Inventory & User Management | JavaScript · HTML5 · CSS3 · 2024 — Authentication flow without frameworks, real-time geolocation and responsive design.
Library Book Rental System | Java · Data structures · 2024 — Rental logic on advanced ADTs with custom sorting and search algorithms.
EGA Transport — Corporate website | HTML5 · CSS3 · 2024 — Mobile-first responsive site, cross-browser compatible.

EDUCATION

Systems Analyst (Analista Programador) | ORT University · *March 2026 – present* — In progress, thesis under development.
Certified Web Programmer | ORT University · *January 2023 – May 2026* — Backend, software architecture, databases and REST APIs.

CERTIFICATIONS

GeneXus 18 Junior Analyst — March 2026 · Cambridge English B2 — First Certificate

STRENGTHS

Persistence: I train Hyrox three times a week: if something does not work the first time, I keep at it until it does. Same with a bug.
Technical versatility: I move between Java, C#, Python and JavaScript without friction, and pick up new stacks quickly.
Quality focus: I care about edge cases and about error messages that actually help the person reading them, not just the happy path.
Languages: Spanish (native). English B2 certified by Cambridge.
